- m) ____ is called breeze.
i) storm wind ii) heavy rain iii) gentle wind
- n) When the wind blows very hast then it called ____.
i) breeze ii) gale iii) storm
- o) When the wind moves with great speed then it is called ____.
i) snow ii) storm iii) gale

Chapter: 8

Air, Water and Weather

1. Choose the correct answer:

Ans: a) (ii), b) (iii), c) (iii), d) (i), e) (i), f) (iii), g) (iii), h) (ii), i) (i), j) (iii), k) (iii), l) ((iii), m) (iii), n) (ii), o) (ii).

2. Match the Columns:

Column-A	Column-B
a) Forms of water	i) tiny drops of water
b) Clouds	ii) Summer, Winter and Rainy season
c) The main three seasons	iii) oxygen, carbon dioxide, nitrogen
d) In winter	iv) ice, liquid and water vapour
e) Important gases	v) the days are short

Ans.: (a+iv), (b+i), (c+ii), (d+v), (e+iii)

3. Short questions:

a) Why does the weather keep changing?

Ans: The weather keeps changing because of the sun, air and water.

b) What gasses are use to make air?

Ans: Air is made up of several gases. The important ones are oxygen, carbon dioxide, and nitrogen.

c) What is called breeze?

Ans: When the wind blows very gently, then it is called breeze.

d) What is called gale?

Ans: Sometimes the wind blows very fast. We call this a gale.

4. Broad questions:

a) What is the forms of water? Describe.

Ans: The forms of water are- solid, liquid, and water vapour. Liquid water is found in rivers, lakes, seas and under the ground. Heated water changes into water vapour. And cool water changes into solid (Ice).

b) Describe the water cycle?

Ans: The heat of the sun warms the water in seas, rivers and lakes. It changes to water vapour and mixes with air. This water vapour changes into clouds. When the clouds pass through the cooler air, they become rain. This water goes back into rivers, lakes and seas. This process goes on repeating. It is called the water cycle.

Weather and Season

1. Choose the best answer:

a) Which is the source of heat and energy?

- i) Sun ii) Moon iii) Jupiter

b) Which daily variation is called weather?

- i) heat ii) cold iii) heat and cold

c) How many main seasons are there in nature?

- i) Two ii) Three iii) Four

d) How many seasons are there in our country?

- i) three ii) six iii) five

e) Which season comes after rainy season?

- i) Summer ii) Winter iii) Autumn

f) Which season comes at last?

- i) Late Autumn ii) Spring iii) Summer

g) Different kinds of flowers bloom in ___ season.

- i) Summer ii) Spring iii) Rainy season

h) When the sun is not there and the earth becomes dark, that is ____.

- i) The night time ii) The mid day time iii) The day time

i) Which can change every few minutes to few hours?

- i) Climate ii) Environment iii) Weather

Lesson-09

Weather and Season

1. Choose the best answer:

Ans.: a) (i), b) (iii), c) (ii), d) (ii), e) (iii), f) (ii), g) (ii), h) (i), i) (iii)

3. Match the column A with column B:

Column A	Column B
a. Summer	i) June – July
b. Autumn	ii) October – November
c. Winter	iii) February – March
d. Rainy Season	iv) April – May
e. Late Autumn	v) August – September
f. Spring	vi) December - January

Ans: (a+iv), (b+v), (c+vi), (d+i), (e+ii), (f+iii).

3. Answer the following question:

a) What is weather?

Ans: The conditions of the atmosphere of a particular place at a particular date and time of a day is called weather.

b) What is climate?

Ans: The average condition of weather of a particular place for 40 years is called the climate of that area.
